

VQB5 sites that serve 3- and 4-year-old children are invited to participate in VKRP and VALLSS

What is VALLSS?

Virginia Literacy Partnerships (VLP) offers **Virginia Language & Literacy Screening System** (VALLSS) to assess language and literacy in the areas of alphabet knowledge, phonological awareness, passage comprehension, and emergent writing.

What is VKRP?

The **Virginia Kindergarten Readiness Program** (VKRP) partners with VLP to also assess children's mathematics (Early Mathematics Assessment System), self-regulation, and social skills (Child Behavior Rating Scale).

Together, these assessments support school readiness by helping teachers understand children's development of critical foundational skills necessary for future learning and growth.

What are the benefits of using VALLSS and VKRP?

- Gain useful information about children's skills.
- Track children's skill development up to three times a year (Fall, Mid-Year, and Spring).
- Review reports that present scores at the student, classroom, and site levels.
- Access to training (including demonstration videos) in using and interpreting assessments.
- Download instructional resources for classroom use and to share with families.
- Access Hotline Support to help with questions and provide navigational support in real time.

How do I sign up?

For Spring 2027:
Sign up on or before
November 20, 2026.

[VALLS/VKRP Request Form](#)

For Fall 2027:
Sign up on or before
May 1, 2027
(spaces are limited
after this date).

What comes next?

Sites will be contacted after the opt-in window closes to confirm interest.
